

CANNRA Webinar & Workshop on: CANNABIS WASTE ISSUES

*Presented by the CANNRA Special Committee on
Energy & Environment*

WHEN: July 27th from 11 AM PST/2 PM EST – 12:30 PM PST/3:30 PM EST

WHO SHOULD ATTEND? Attendees must be employees of state or territorial government agencies. Attendees of this webinar do not need to be from CANNRA member agencies. So whether your state has a statewide CANNRA membership or not, please invite relevant government employees who work on or could be impacted by cannabis waste issues.

WHERE: Zoom

Registration required: https://csg-org.zoom.us/meeting/register/tZ0pf-2hrjotGtLMYK-RASN67gE4_b2UBgS6

WEBINAR DESCRIPTION:

The cannabis industry produces a lot of waste including plant waste, packaging waste, lighting waste, and solvent waste. Some waste streams are highly regulated and others have disposal policies that mandate increased waste generation. Learn from Colorado and Michigan about the various waste streams and environmentally efficient practices to address each one.

Webinar objectives include to:

- Discuss the cannabis industry's waste streams
- Evaluate best practices for handling and reducing waste from cannabis business
- Understand emerging waste issues unique to the cannabis industry

SPEAKERS:

- Mike Bankoff, Environmental Protection Specialist, Colorado Department of Public Health and Environment.
- Aaron Hiday, Compost Program Coordinator, Michigan Department of Environment, Great Lakes, and Energy (EGLE).
